WHY CHOOSE PGDM-X?

PGDM-X is a next-gen, industry-aligned management program designed to create highly employable professionals in Finance & Valuation and Entrepreneurial Finance & Fintech. Each specialization is delivered through our elite Top 30 format, focusing on personalized learning, global exposure, and 100% placement assurance.

TOP 30 FINANCE & VALUATION

Our Finance & Valuation specialization under the PGDM-X program is designed to prepare students for one of the fastest-growing and future-focused domains in global finance—business valuation. As per HFT Market Intelligence, the global valuation services market exceeded USD 16.3 billion in 2024 and is projected to reach USD 21.6 billion by 2031, growing at a CAGR of 5.64%. With a rapid rise in mergers & acquisitions, regulatory compliance, financial reporting requirements, and expansion of alternative investment funds, the demand for skilled valuation professionals is growing rapidly across the globe. This program equips students to capitalize on these opportunities through a deep understanding of valuation methodologies, regulatory frameworks, and real-world application. Our curriculum is developed in line with International Valuation Standards (IVS) and is delivered by seasoned industry experts and leading academicians.

Students will learn to handle all three major facets of valuation: value assessment, value generation, and value safeguarding. The program also covers areas such as financial modelling, litigation support, and valuation in arbitration—a fast-emerging and highly rewarding niche. India remains underpenetrated in this domain, with only 2,272 Registered Valuers and 119 Registered Valuer Entities as of March 2025—making this an ideal time to enter the profession and build an early-mover advantage. From day one, students engage directly with valuation firms, industry mentors, and international best practices. Uniquely positioned in the NCR region, our program covers the full spectrum of valuation expertise, emphasizing both theoretical concepts and practical application within the framework of Valuation Standards and the Mandatory Performance Framework (MPF). The curriculum also provides specialized insights into assessing economic damages and intangible asset valuation, further enhancing career prospects in this dynamic industry.

Our Banking & Finance specialisation under the PGDM-X program is designed to prepare students for high-growth careers across India's evolving financial ecosystem and the global banking and financial services industry. Built around a distinctive Dual-Track Advantage—Global Banking and Indian Banking, the programme combines international finance, foreign exchange, trade finance and offshore banking, including GIFT City and International Financial Centres (IFCs), with strong foundations in retail and corporate banking, treasury management, credit appraisal and financial regulation. The curriculum is designed to develop professionals who can understand, analyse and navigate both domestic and international financial markets while responding effectively to the rapidly transforming banking landscape.

The programme goes beyond traditional banking to incorporate emerging areas such as Digital Banking, FinTech, Blockchain, AI-enabled Financial Analytics, Investment Banking, Wealth Management, Risk Modelling and Regulatory Compliance. Students gain a comprehensive understanding of financial systems, cross-border transactions and regulatory frameworks governed by RBI, SEBI and IFSCA. Through live datasets, financial modelling labs, simulations and industry-led projects, students develop hands-on expertise in credit analytics, treasury and portfolio management, risk assessment and strategic financial decision-making. Field exposure to inclusive finance, structured industry mentoring and practical applications further strengthen professional readiness, enabling students to build careers across banking, corporate finance, treasury, investment banking, wealth management, risk management, FinTech and financial analytics.
