WHY CHOOSE PGDM-X?

PGDM-X is a next-gen, industry-aligned management program designed to create highly employable professionals in Finance & Valuation and Entrepreneurial Finance & Fintech. Each specialization is delivered through our elite Top 30 format, focusing on personalized learning, global exposure, and 100% placement assurance.

TOP 30 > FINANCE + VALUATION

Our Finance & Valuation specialization under the PGDM-X program is designed to prepare students for one of the fastest-growing and future-focused domains in global finance—business valuation. As per HFT Market Intelligence, the global valuation services market exceeded USD 16.3 billion in 2024 and is projected to reach USD 21.6 billion by 2031, growing at a CAGR of 5.64%. With a rapid rise in mergers & acquisitions, regulatory compliance, financial reporting requirements, and expansion of alternative investment funds, the demand for skilled valuation professionals is growing rapidly across the globe. This program equips students to capitalize on this opportunity through a deep understanding of valuation methodologies, regulatory frameworks, and real-world application. Our curriculum is developed in line with International Valuation Standards (IVS) and is delivered by seasoned industry experts and leading academicians.

Students will learn to handle all three major facets of valuation: value assessment, value generation, and value safeguarding. The program also covers areas such as financial modelling, litigation support, and valuation in arbitration—a fast-emerging and highly rewarding niche. India remains underpenetrated in this domain, with only 2,272 Registered Valuers and 119 Registered Valuer Entities as of March 2025—making this an ideal time to enter the profession and build early-mover advantage. From day one, students engage directly with valuation firms, industry mentors, and international best practices. Uniquely positioned in the NCR region, our program covers the full spectrum of valuation expertise, emphasizing both theoretical concepts and practical application within the framework of Valuation Standards and the Mandatory Performance Framework (MPF). The curriculum also provides specialized insights into assessing economic damages and intangible asset valuation, further enhancing career prospects in this dynamic industry.

If you see yourself as an entrepreneur, a start-up consultant, an asset manager, an investor, a social entrepreneur, or a finance specialist in the FinTech field, including banks, NBFCs, insurance firms, and other financial service providers, this course is tailored for you. The course seeks to offer a comprehensive perspective on the FinTech phenomenon by exploring the convergence of finance, technology, and entrepreneurship. The course has two primary focus areas: entrepreneurial finance and FinTech. Entrepreneurship is a growing focus in today's economy, with many individuals seeking to turn innovative ideas into financially stable start-ups. This course provides practical knowledge to evaluate business opportunities, choose appropriate legal structures, develop pitch decks, build financial models, secure funding (including SME IPOs), and plan for growth and exit strategies. It also covers private equity dynamics and investor negotiations. In parallel, the financial sector is being reshaped by FinTech.

The rise of neobanks and digital platforms is driving competition and innovation, offering new career opportunities and operational efficiencies. As FinTech shifts from consumer-focused solutions to B2B services, it is poised to become a USD 1.5 trillion industry by 2030. This course equips students to navigate and leverage these developments in both entrepreneurship and financial technology. This program, developed by industry experts and taught by a mix of practitioners and new-age scholars, is the only initiative in the NCR region for the upcoming generation of FinTech finance professionals who will gain comprehensive insights into entrepreneurial finance, BankTech, RegTech, Insurtech, and WealthTech.
